

Exhibitor Move-In

All major stand construction must be completed and all aisles cleared by 18:00 on Sunday 24 September 2023 to allow sufficient time to finish preparing the Exhibit Hall for opening Monday, 25 September 2023.

Airspace Integration Congress strongly encourages Exhibitors who may need extra build time to take advantage of the Early Move-In opportunities to ensure completion of your stand build on schedule. No additional collective build time other than the Early Move-In option on Thursday are being provided.

Early Move-In Exhibitors must separate the delivery of stand construction material from stand content (furniture, equipment, printed material, food, and beverage, etc.). The lack of open space in the Exhibit Hall to unload and store stand content has unfortunately forced us to take this action to ensure that all Early Move-In Exhibitors have adequate space to stage their stand construction while keeping aisles open as mandated by IFEMA MADRID.

ON EARLY MOVE-IN DAY (Thursday, 21 September), ONLY STAND CONSTRUCTION MATERIAL WILL BE ALLOWED TO UNLOAD.

Starting Friday, 22 September 2023, stand content may be unloaded into the Exhibit Hall. Airspace Integration Congress Staff, and our Freight Forwarder Vendor/Early Move-In Coordinator DSV Fairs & Events Spain (formerly Agility) will be on standby to answer any questions and to assist through this process.
